2011-08-02

Dear Mrs. Ex-President Prof. Biasutto,  
Dear Council Members of the AAAC,  
Dear Members of the AACCA,

The 12<sup>th</sup> Congress of the European Association of Clinical Anatomy (EACA) will take place in Lisboa, Portugal in the first half of July, 2013. The congress will be organized by Prof. Dr. Antonio Jose Goncalves-Ferreira and his team.

It is with great pleasure that I, on behalf of the EACA-Council and on behalf of the Congress Organising Team invite you - the members of the *Asociación Argentina de Anatomía Clínica* - to participate and contribute to this international congress that covers a wide variety of topics like clinical anatomy, functional histology, sports anatomy, kinesiology, anatomical techniques, and anatomical basis for anaesthesiology, surgery and radiology and medical education.

After more than five years of the AAAC it should be a good idea to join other international groups to see that we are facing similar challenges worldwide, but strategies may be different. And finally, the larger the group the stronger we are.

I wish you a very nice, interesting and fruitful congress in Tucuman. I am deeply sorry that I cannot be with you, but I have to run a surgical training course on the spine with 180 international participants at the same time of your conference.

Yours sincerely,

**Andreas H. WEIGLEIN**  
EACA Councilor & International Congress Coordinator
